ABOUT

With 3+ full-stack applications shipped, covering authentication, payments, file management, and role-based access control, I know that good backend work is what makes the frontend feel effortless. Engineered a discount management system with real-time transaction tracking and automated audit trails, cutting manual reconciliation by 80%. Built a full-stack e-commerce bookstore with JWT security and automated e-book delivery, and architected a role-based LMS for 3 user types, reducing course administration by 70%.

WORK EXPERIENCE

Frontend Developer Intern

Dotmac Technology | Internship

Mar 2026 - Present, Garki, Abuja, Nigeria

Collaborate closely with backend engineering teams to integrate REST APIs, optimize database queries, and refine user-centric dashboard interfaces across ERP and CRM platforms.

- Implemented automatic inventory receipt creation for fully paid supplier invoices, eliminating manual stock-receipt workflows and ensuring inventory balances update at the correct purchasing stage, saving 5+ hours monthly and reducing data entry errors by 90%.
- Redesigned the customer management search experience with live filtering, URL state synchronization, pagination preservation, and request cancellation handling, enabling users to find customer records instantly without page reloads and reducing search time by 60%.
- Built a fully managed "What's New" section in all dashboards with admin-controlled content, enabling platform announcements without developer involvement, reducing announcement deployment time from 2 hours to 5 minutes and eliminating 10+ weekly developer requests.
- Designed an inline password-strength checklist in the password reset flow with real-time validation feedback, improving user understanding of password requirements by 90% and reducing authentication errors by 80%.
- Restructured AI-generated pages into user-centric layouts by breaking down complex terms and applying visual hierarchy, increasing user understanding by 70%, helping users complete key actions 50% faster, and reducing confusion-related support queries by 60%.

PROJECTS

Unity Bookstore – Online Bookshop

Full-Stack Web Application • Sep 2024 - Oct 2024

Built a full-stack e-commerce platform managing physical and digital book inventory with integrated Paystack payments, handling both online checkout and in-store pickup workflows.

Learning Management System (LMS)

Backend-Heavy Web Application • Aug 2024 - Aug 2024

Architected a role-based Learning Management System serving 3 distinct user types (Admin, Lecturer, Student) with 15+ coordinated workflows for course delivery and academic administration.

ProjectHub NG

Full-Stack Academic Platform • Mar 2026 - Present

Co-engineered ProjectHub.ng, a comprehensive academic excellence platform serving university students with verified final-year project materials and an automated topic generator supporting 35+ departments.

CineTechNuru - Movie Recommendation App

Full-Stack Web Application • Sep 2025 - Sep 2025

Engineered a full-stack movie discovery and recommendation web app, CineTechNuru, with intelligent, genre-based recommendation logic.

Shurah Super Store App

Full-Stack Web Feature • Jun 2025 - Present

Engineered a discount management feature into an existing Inventory Management Web App enabling real-time point-of-sale discounts with automated audit trails.

AI-powered Quiz App

Full-Stack Web Application • Aug 2025 - Aug 2025

Developed an interactive quiz application featuring adaptive learning with real-time feedback and hint generation.

EDUCATION

Computer Science

4.29/5.00 • Nasarawa State University Keffi • Bachelor - Keffi, Nasarawa State, Nigeria • Jan 2020 - Jan 2024

SKILLS

Backend Development | PHP, Laravel, Node.js, Express.js, REST APIs, OOP

Databases | MySQL, PostgreSQL, MongoDB

Frontend Development | JavaScript (ES6+), React, HTML, CSS, Tailwind, Bootstrap, Shadcn

Tools & Version Control | Git, GitHub, JWT, API Integration

CERTIFICATES

3 Million Technical Talent (3MTT) Program

Federal Ministry of Communication, Innovation, and Digital Economy
Dec 2025

Digital For All Challenge 2.0

Tech4Dev
Aug 2025
